

Important Note:

*CMB International USD Money Market Fund (the "Sub-Fund") may be subject to a) Investment risk, b) Fixed income securities investment risk (including Short-term fixed income instruments risk, Credit / counterparty risk, Volatility and liquidity risk, Interest rate risk, Credit rating and downgrading risk, Credit Rating Agency Risk, Valuation Risk, Sovereign debt risk), c) Risks associated with bank deposits, d) Emerging market risk, Mainland China investment risk and Concentration risk, e) Eurozone risk, f) Currency and foreign exchange risks, g) Risks associated with investment in FDIs and hedging. There is a risk that you may not recoup the original amount invested in the Sub-Fund or may lose a substantial part or all of your investment. *The purchase of a Unit in the Sub-Fund is not the same as placing funds on deposit with a bank or deposit-taking company. The Sub-Fund does not guarantee repayment of principal and the Manager has no obligation to redeem the Units at the offered value. The Sub-Fund does not have a constant Net Asset Value. The Sub-Fund is not subject to the supervision of the Hong Kong Monetary Authority. * The Sub-Fund invests primarily in short-term deposits and debt securities. * Investors should not make investment decisions based solely on the information provided in this file, and should review the Sub-Fund's offering documents carefully including the risk factors.

1 Inception date 2024/02/02

2 The 7-day annualized yield reflects the money market fund's net asset value (NAV), without reinvested dividends, over the past seven days. Calculation formula: 7-Day Annualized Yield (%) = (net value on day T - net value on day T-7) / net value on day T-7 / (number of natural days between day T-7 and day T) * 365 * 100% (T is 2024/10/31). Please note that this figure is a hypothetical performance which is calculated based on a 7-day period of the Fund's past performance and does not represent an actual one-year return.

3 The annualized rate of return refers to the net rate of return of the fund since the establishment of the fund, which is converted into an annual rate of return. Calculation formula: Annualized rate of return = (net value on day T - net value on fund establishment day) / net value on fund establishment day / (number of natural days between fund establishment day and day T) * 365 * 100% (T is 2024/10/31, and fund establishment day is 2024/02/02). Please note that this data is calculated based on assumptions about the fund's performance since the establishment of the fund and does not represent actual one-year returns.
